

preisliste 2021 / price list 2021

lumini

LUNA C

lumini is above all one thing - fernando prado.

in europe, fernando prado is sometimes known only to a few. in his home country brazil, however, he is more of a pop star among designers. one of his lamps even received its own stamp in 2005.

fernando prado was born in 1971 in sao paulo, brazil. his father was an architect and so little fernando was already allowed to let off steam in his father's studio. he was especially enthusiastic about drawing. after studying industrial design at the faap in sao paulo, he initially devoted himself to lighting design. however, he soon devoted himself full-time to lighting design. on the brazilian designer's website we find a remarkable list of prizes and awards. prado has also been working as creative director at lumini since 2003.

lumini ist vor allem eines – fernando prado.

in europa ist fernando prado bisweilen nur wenigen bekannt. in seinem heimatland brasilien dagegen ist er eher ein popstar unter den designern. so erhielt eine seiner leuchten im jahre 2005 sogar eine eigene briefmarke.

fernando prado wurde 1971 in sao paulo, brasilien geboren. sein vater war architekt und so durfte der kleine fernando sich bereits im väterlichen atelier austoben. vor allem das zeichnen begeisterte ihn. nach seinem studium des industriedesigns an der faap in sao paulo widmete er sich zunächst der lichtplanung. schnell verschrieb er sich jedoch hauptberuflich dem leuchtendesign. auf der website des brasilianischen designers finden wir eine beachtliche liste an preisen und auszeichnungen. zudem arbeitet prado seit 2003 als creative director bei lumini.

DESIGN PLUS

topXXI

the brazilian company founded in 1979 was originally mainly working in the field of technical lighting and special lighting solutions for architectural objects but has very soon ventured successfully into the high - quality segment of designer lighting.

today the company with its production site in sao paulo employs a staff of more than 300 and exports its products to 30 countries all over the world. the international success of the lights [lighting systems] is on the one hand due to their stylish and creative design, which has already won many awards, on the other hand to the extraordinarily high technical standard and quality of the objects, which are moreover still partly manufactured by hand [handmade].

since 2004 the company with its business partner responsible for distribution lumini beleuchtungslösungen based in kitzingen has also been present on the european market and maintains sales offices and warehouses in europe. the various exclusive models are available in the upmarket lighting trade and in high - quality furniture stores.

das 1979 gegründete brasilianische unternehmen war ursprünglich hauptsächlich im bereich der technischen beleuchtung und im zusammenhang mit architektonischen objekten tätig, hat sich aber recht bald mit erfolgi n das segment der hochwertigen designleuchten gewagt.

heute beschäftigt das werk mit produktionsstandort in sao paulo mehr als 300 mitarbeiter und exportiert seine produkte in 30 länder in aller welt. der internationale erfolg der leuchten beruht zum einen auf dem mit vielen preisen bedachten stilvollen und kreativen design, zum anderen auf dem technisch optimalen standard der qualitativ hochwertigen objekte, die zudem zu einem teil immer noch in handarbeit gefertigt werden.

seit 2004 ist die firma mit dem distributionspartner lumini beleuchtungslösungen mit sitz in kitzingen auch auf dem europäischen markt vertreten und unterhält dort sowohl vertriebsbüro als auch lager. erhältlich sind die exklusiven verschiedenen modelle im gehobenen leuchtenhandel und in anspruchsvollen einrichtungshäusern.
