# Construction Lamp Floor

JOOST VAN BLEISWIJK, 2012

The Construction lamp ultimately originates from a bright curiosity combined with expert skills, industrial tools and a touch of playful passion for vintage construction toys. As a result, the lamp's details and joints take the shape of Victorian cast iron components and become part of a base that resembles a traditional electricity pole. Enjoy a high voltage stream of inventiveness and light!

# Farooo

MARCEL WANDERS STUDIO, 2012

The name Farooo is inspired by the Italian word for a lighthouse and its intense beam of light, which acts as guidance for ships around dangerous coastlines. Characterized by a sinuous, ornamental body & a contemporary shade, this lamp comes in three imposing dimensions & a choice of several stylish colours. Let yourself be led to safety with Farooo's light beam, and float happily towards its soft, placid glow.

## Filigree Floor Lamp

RICK TEGELAAR, 2016

“What distinguishes a lamp from a light source?” is the question that initially triggered Rick Tegelaar to imagine and create the Filigree Floorlamp. Thanks to an elegant and dainty network of fine wires, that reminds us of delicate filigree jewelry, the translucent screen protecting the powerful LED light at the heart of the lamp is held under tension, distributing a soft light glow evenly across the room. When pointed towards a wall or ceiling, with the ornamental filigree flower structure facing us, the lamp projects a playful network of shadows to mesmerize and entertain.

True to the dimensions of a real horse, the Horse Lamp by Front brings a touch of nature in fairytale style and genuine madness. His talent to make a bold statement is so well-developed, that trying to feed him carrots wouldn't do him justice. In fact; a spotlight is what he deserves.

## Prop Light Floor

BERTJAN POT, 2013

"We have round lights, we have straight lights. We have them with lights on one side, we have them with lights on two sides. You can hang them high, low, horizontally, vertically or even hang them in an angle. Put them on the floor, hang them on your wall or down from the ceiling. We find it very hard to imagine an interior where this prop is not in place" - Bertjan Pot

## Raimond II Tensegrity

RAIMOND PUTS, 2014

The Raimond Tensegrity is a floor lamp made from elegant metal, complemented with the sturdy earthiness of wood.

Tensegrity is a term that was first described by Buckminster Fuller as an architectural term. It refers to the interconnected wooden structure that uses tension and pressure to keep its shape. The beauty of the Raimond Tensegrity lies not only in its contrasting materials, but also in the trigonometric harmony of both structures. Mathematical perfection times two.

## Statistocrat Floor Lamp

ATELIER VAN LIESHOUT, 2014

The floor lamp's lean aluminium body is really multifunctional with its towering two meters and all-embracing light beams, the tallest shade projecting light towards the ceiling while the wider shade acts as the perfect reading lamp. And what about the two other shades? The lowest is no shade ... but a surprisingly useful side table. Perfect to support a laptop or your favorite drink, it's always in the spotlight!

# Bell Lamp

MARCEL WANDERS STUDIO, 2012

"Ting!" is the thing, as there is no gathering without loved ones to gather with. The Bell Lamp represents a very early and essential form of communication, generating a welcoming ring that brings people together for festivities and congregations. With a bottle of champagne and a pile of fruits, the table is decked.

## Coppélia Suspended

ARIHIRO MIYAKE, 2015

Coppélia comes to life in a whirl of flowing motion and sparkling light. With a graceful sense of wonder, a beautiful mechanical doll appears to magically come to life in the famous ballet Coppélia. In the performance the ballerina traces, with sinuous movements, a delicate after-image in the air, which inspires the fluid motion in the design of Miyake's Coppélia Suspended Lamp. The graceful dance, staged by the three-dimensionally crossed wire structure, leads the spectator to dozens of glowing LED lights, which define the contour and the magical glow of Miyake's interpretation of a classic chandelier.

## Gravity Chandelier

PAUL COCKSEGE, 2021

The Gravity Chandelier by Paul Cocksedge re-imagines the chandeliers of the past. Inspired by changing rigidity to elasticity. The Gravity Chandelier is the definition of a modern chandelier. At first glance, it doesn't reveal its flexibility and cleverness; It takes a second look to unravel its mystery. With its flexible arms, you define the chandelier's diameter and choose where the light travels, but the suspended elements create natural curves shaped by gravity.

The Gravity Chandelier comes in two sizes, after the number of arms, Gravity Chandelier 5 and Gravity Chandelier 7.

# Heracleum Endless

BERTJAN POT | POWERED THROUGH ELECTROSANDWICH® BY MARCEL WANDERS, 2014

The Heracleum Endless, by Bertjan Pot, is a perpetual blossom of new branches that multiplies by the meter. Starting out as an experiment and inspired by its namesake flower, the Heracleum Endless know no bounds. Heracleum is powered by Electrosandwich, a technique of coating conductive layers, very thin and delicate. A design not possible with normal wires. The Heracleum Endless comes in three different colours. Let there be no end to the bloom of Heracleum Endless!

## Heracleum III Linear *New*

BERTJAN POT, 2022

Don't confuse the new Heracleum III Linear with its Endless sibling. Look closely and you'll see blossoms gently sweeping upwards at either side, making the Heracleum III Linear perfect to hang above long surfaces, like your dining table or kitchen island. Like the other designs in the Heracleum family, the lean branches are powered by Electrosandwich, by Marcel Wanders studio.

The Heracleum III Linear, available in three colours, is inspired by the flowering plant of the same name. Its bloom frozen in time. This new design in the Heracleum family is the brightest of all. It contains a new driver, making it compatible with our Wireless Wall Switch, and new LEDs; together they offer a higher light output that creates a warm glow.

## Heracleum II Suspended

BERTJAN POT | POWERED THROUGH ELECTROSANDWICH® BY MARCEL WANDERS, 2010

Nature meets technology in the Heracleum II Suspended by Bertjan Pot. This airy LED lamp is inspired by the flowering plant of the same name that can grow as high as 5 metres. The white leaves in the Heracleum II Suspended ramify from one branch creating a very technical, natural structure thanks to Electrosandwich by Marcel Wanders studio. The Heracleum II Suspended comes in two sizes and three different colours.

# Heracleum The Big O

BERTJAN POT | POWERED THROUGH ELECTROSANDWICH® BY MARCEL WANDERS, 2014

In the Heracleum The Big O, by Bertjan Pot, the flowering leaves are shaped in a blossoming crown. In the old days, a circular crown was a symbol of power, eternity and glory. The Heracleum The Big O adds the beauty of nature and prosperity to that row. Available in two sizes and three colours, this festive foliage is suitable for any space and crowns any interior.

# Iconic Eyes

BERNHARD DESSECKER, 2018

The first sparkle of this great idea was inspired by iconic automotive headlights. They have been modified to design a grand pendant light with a classy, powerful impact for the foyer of the Bavarian National Museum in Germany. The light's oval design is modern with a classic touch. It generates a precious ambient glow enhanced by bright rings of light and is produced in two sizes. Glorious and breath-taking in appearance, it consists of numerous lenses and a constellation of LED lights.

# Meshmatics

RICK TEGELAAR, 2017

Whoever sets eyes on the Meshmatics Chandelier will never guess what hides behind its sophisticated appearance. ## NR2

BERTJAN POT, 2015

NR2 by Bertjan Pot is an elegant and bright bubble of white or black thread. The lattice pattern creates a fine web that shines and glimmers in the light. The fine web is oval-shaped and bears the signature style of Bertjan Pot; designs created from an experiment with different materials. The integrated LED lamp in NR2 subtly diffuses a soft and magical glow around the room. NR2 is available in two different colours and sizes.

## Plant Chandelier

KRANEN/GILLE, 2018

The philosophy behind the Plant Chandelier, designed by Kranen/Gille, is the imitation of nature's structures while indulging in the poetry of their beauty. Inspired by the linear patterns of Karl Blossfeldt's plant photography, and unrestricted by cables or wires, the Plant Chandelier is free to elegantly bloom towards the ceiling. Its silhouette follows the anatomy of sun-kissed tree branches, with a golden glow, which converges into frosted domes of light.

# Plié Plissé Light

LUKAS BAZLE, 2021

Plié Plissé Light by Lukas Bazle is inspired by the kinetic movements found in nature. This kinetic design has an adjustable cellular pleated shade that lets you choose the intensity and direction of the light. Unfolded, the light is soft and diffused. Perfect for (dinner) parties and lighting your whole room up. Fold the shade in and the lamp shines downwards and more intense, making it easier to work or read a book. As if dancing, Plié Plissé Light moves along with the rhythm of your day.

# Prop Light Suspended

BERTJAN POT, 2013

"We have round lights, we have straight lights. We have them with lights on one side, we have them with lights on two sides. You can hang them high, low, horizontally, vertically or even hang them in an angle. Put them on the floor, hang them on your wall or down from the ceiling. We find it very hard to imagine an interior where this prop is not in place" - Bertjan Pot

## Raimond II

RAIMOND PUTS, 2009

The Raimond lights: perfect spheres of mathematical ingredients punctuated by tiny LED lights. Designer Raimond Puts was not only intrigued by the shape of the geodesic dome, but also with the mystery of prime numbers. It's no coincidence that the dimension of all Raimond lights resemble a prime number. The result of mathematical perfection, that brings the starry night sky into your home.

Compatible with our Wireless Wall Switch, for quick and easy dimming that gives you full control over the light output.

## Raimond II Dome

RAIMOND PUTS, 2009

The Raimond Dome is made of the same mathematical ingredients as its spherical family members. Also punctuated by tiny LED lights but amplified with a powerful light source in its centre. Looking at the Raimond Dome feels like staring into the soft glow of a starry night, making it the perfect light for dining under the stars. Designer Raimond Puts passed away before he could see the final design. Together with Raimond's wife, artist & designer Tis Ernst, Moooi completed the Raimond Dome.

Raimond Dome 79 is compatible with our Wireless Wall Switch, for quick and easy dimming that gives you full control over the light output.

## Raimond II R127-R163-R199

RAIMOND PUTS, 2009

The Raimond lights: perfect spheres of mathematical ingredients punctuated by tiny LED lights. Designer Raimond Puts was intrigued by the shape of the geodesic dome and with the mystery of prime numbers. It's no coincidence that the dimension of all Raimond lights resembles a prime number. The result of mathematical perfection that brings the starry night sky into your home.

## Raimond II Zafu

RAIMOND PUTS, 2009

The Raimond Zafu creates an extra-terrestrial effect with its elliptical shape and tiny LED-lights. Like its spherical family members, the Raimond Zafu is made from the same elegant metal strips and mathematical ingredients. The name Zafu comes from the transcendental shape inspired by designer Raimond Puts' meditation cushion.

Raimond Zafu is compatible with our Wireless Wall Switch, for quick and easy dimming that gives you full control over the light output.

NIKA ZUPANC, 2008

Who is afraid of pink? My imagination chases female archetypes intentionally. Frivolous, even naive objects are my favorite victims. And when, during such a process, I manage to be creative in an evidently reserved way, I then touch the purest meaning of my work and frivolity becomes timeless elegance.

# Space Table Lamp

WARD WIJNANT, 2020

The Space Table Lamp, designed by Ward Wijnant, is as much a mirror as it is a table lamp. Untouched the lamp reflects its surroundings, but the mirror will become translucent when the lamp is turned on. The lamp has four different light settings and features an innovative Dim-To-Disco option that will make the bulbs change from warm light into soft pastel, to eventually start a colorful disco.

# The Golden Chair

NIKA ZUPANC, 2013

Under a mysterious magic spell, a retro-looking school chair is dipped in enchanted golden nectar, which washes away its austerity and crowns it with a shiny aureole. Isn't this a typical school-time wish, while looking out of the window and hoping for a fairytale to begin? The Golden Chair got a black framed sister in 2018, and both can be dressed in a selection of fabrics to match different interiors.

## Smoke Dining Chair

MAARTEN BAAS, 2002

Don't burn the diner – burn the dining chair! The beauty and character of burned wood is now captured in a long lasting material, creating the strange sensation of sitting on burnt furniture. Maarten Baas interpreted his fascination for the element fire with a groundbreaking approach. Capturing the burning flames into the solidity of wood. Each chair is unique due to this exceptional production process. Just like the Phoenix, the Smoke objects are reborn from their ashes, gaining new vitality and beauty in a very unusual way.

# VIP Chair

MARCEL WANDERS STUDIO, 2000

The V.I.P. Chair lives up to its name: its arms and backrest remind of a royal throne and its comfort emphasizes this impression quietly. However, the V.I.P. chair, designed by Marcel Wanders studio, doesn't present an overloaded royal sitting device, but a comfort chair that suits in every surrounding.

MARCEL WANDERS STUDIO, 2020

Sofa So Good by Marcel Wanders studio is a modular sofa system made of generous proportions and feather-like softness. It's made from the highest quality materials and combines smart design and ultimate comfort. A story of contrasts with its linear framework and curvy softness.

The sofa system includes eight different upholstered modules, two tables and three shelves. The tables and shelves are available in six different wood finishes. An eclectic range of fabrics to choose from—like the newly added colours in the Extinct Animals fabric collection—completes the set-up. Sofa So Good is endlessly versatile and is suitable for any interior. In our online configurator you don't just create a sofa; you create a personal space tailored to your needs.

# Liberty Table

ATELIER VAN LIESHOUT, 2018

The Liberty table, designed by Atelier Van Lieshout, is a typical example of artwork turned into a design object, just like the earlier released Liberty Lounger. With the Liberty Table, Atelier Van Lieshout continues to address the New Tribal Labyrinth and "Arts and Crafts" movement with traditional craftsmanship and using simple forms.

# Monster Table

MARCEL WANDERS STUDIO

The Monster table is the largest Monster ever created. It has the same great genes and curving lines of the Monster chair. The Monster table has a huge appetite that needs to be satisfied, so we advice to have a gathering around the Monster table at least once a day, preferably around dinner time. Do not forget to feed it with flowers, poetry and love.
